Problems of the Day

Day 28

1 Maisie buys 5 boxes of eggs.

Each box contains 12 eggs.

She uses 18 of the eggs.

What fraction of the eggs does she have left?

$\frac{42}{60} = \frac{7}{10}$

2 Max has some bags of apples and some bags of oranges.

- There are twice as many oranges as apples in a bag.
- Max has 4 bags of apples and 3 bags of oranges.
- Max has 70 apples and oranges in total

How many oranges are in one bag?

There are 14 oranges in one bag.
