Problems of the Day

Day 29

1 A number line has 2 numbers marked.

True or False

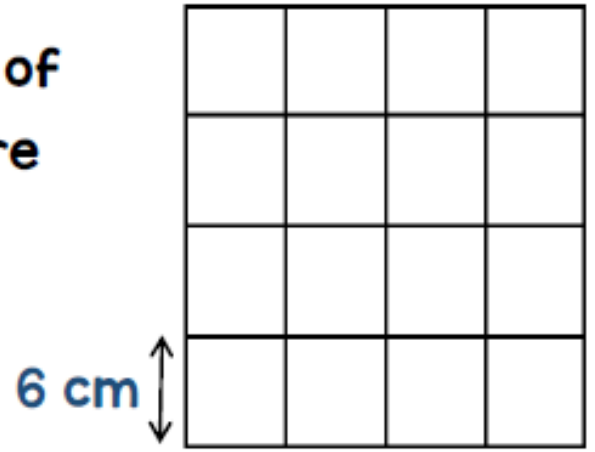

$A + B > 250$

Explain your answer.

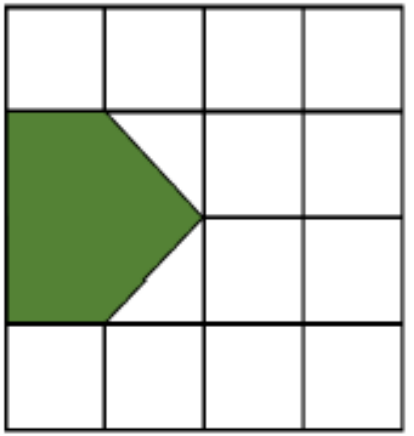

True. 110 + 140 = 250, and A is greater than 110 and B is greater than 140 so their total must be greater than 150

2 Dana has a square grid.

The length of each square is 6 cm.

Dana shades in part of the grid.

What is the area of the shaded part of the grid?

108 cm²
