I have a dream 4

I have a dream,

a world of healthy humans and welcoming wildlife.

A wonderful world with no vicious viruses, or disgusting diseases. A world of science where the best defiance is obtainable medicine.

I have a dream,
a world of kindness and forgiving, living in perfect harmony. A world with no violence to anyone or any creatures. A world of calm, stress-free like a coca cola enjoyed by me.

I have a dream,
a world filled with colour and curiosity where-ever you may be. An underwater world with so much sea to see. A world beneath the ocean, enjoyed by swimmers like me.

I have a dream,

to start recycling more. The world creates too much waste, less plastic would be fantastic. The key is to use the waste in great haste.

I have a dream,
of a one world government working together. Fighting for fairness and not being careless.
Countries need to stop arguing and work together, for the good of our one world.
