I HAVE A DREAM…

By Felix James

I have a dream… that one day we will not live in a world full of pollution,
We would breathe in fresh air, all we need is a solution.

I have a dream… that one day our nation will live in peace,
And all our families will be able to relax in their homes with no fear, because of our police.

I have a dream… that the generations to come will be able to have their own voiced opinion,
And there will be no people feeling like a small, silenced minion.

I have a dream… that we will have no racism on our Earth,
That we will not be judged by the colour of our skin, at birth.

These are MY dreams…
THIS is my hope and faith,
I WANT this nation to rise up and help others.
